

Supply Chain Products

Technical Comparison Table

Technology			
	SCP	Competitors	SCP Advantage
Database	Any SQL Database	Proprietary or specific DB	Infrastructure
Platform	Client/Server, Java VM	Specific platform	Portable
Architecture	Distributed, 3-tier client/server	Varies	Low Network overhead
Language	Java/Object Oriented	Varies	Modern Object Oriented software can run as a standalone application or Web Based applet
Software Upgrades	Automated Delivery and Installation	Manual polling, installation and implementation	Efficiency
Version Control	Automated version control/integrity checking	None	Integrity
Client Hardware	Pentium or Higher running Windows	Varies	Infrastructure
Scalable	NT/Unix/AS400/Mainframe	Varies	Supports multiple platforms and configurations
Interfaces	Real-time invoice & receipt interfaces	Batch/offline	Efficiency
Presentation			
Windows Environment	Drag/drop, cut/paste, drop-down menus, customizable toolbar	None	Each user can personalize desktop for familiarity and increased productivity
Screens	Multiple, concurrent screens can be opened	Single screen	Usability
